

FestiveLights™

For business

2020/2021 Collection

Welcome

to the 2020/2021 collection

With over 20 years of lighting experience, we've got the knowledge, expertise and product ranges to make sure you've got everything you need to bring every event to light! Over the past two decades, we've polished our products and services to perfection, from tailored quotes to bespoke products, for installations of every size.

We won't settle for anything less than the very best quality and we're constantly expanding and developing our products to keep ahead of the trends; keeping pace with technological advancements in an exciting and ever-evolving industry. Our lighting ranges are well equipped to light up weddings, hotels, corporate events and festivals, to name a few. There is literally no job too big or too small!

We make sure every order is packaged with care and efficiency, offering worldwide and next day delivery options. We keep our 50,000sqft distribution centre packed to the rafters with every product you could ever need (plus a few more for good measure!) to make sure that when you order, we deliver.

Our team is here to guide you, so please don't hesitate to get in touch.

Matt, Jo, Dan, Mark & Richard

Superior quality lights, recommended by the professionals.

Offering reassuring performance for all commercial displays, this high quality connectable system uses durable rubber cabling and innovative bulb sealing technology. With an IP65 rating and advanced connections, these lights are built to withstand changeable weather conditions, making them perfect for prolonged outdoor use.

about anything, even down to the unique, wing-shaped connectors which make secure tightening a doddle even in wet conditions. The LEDs are glued into specially aligned polycarbonate caps, using epoxy resin, which ensures a reliable and consistent electrical connection and superior protection against moisture ingress.

We've taken extra special care of every detail with these lights, so you don't have to worry

We're always adding new lines to this range, making sure we're ahead of the game with

emerging trends, and meaning your displays never lose their sparkle.

ConnectPro string lights

The most iconic and versatile of the lighting world, string lights can be used to style any event. Wrapped around large trees, used to create curtains, or for show-stopping canopies, these adaptable lights are connectable up to 1,500 metres.

Combine them with any of the ConnectPro accessories to make installation a breeze, whatever the venue size.

CONNECTING: Male and female connectors slot together until the rubber seal is reached. Tighten the exterior cap using the wings, ensuring the connection is weatherproof. Our 4A rectified 240V power cable can support up to 720 Watts (e.g. 1,500m of linear string lighting).

ConnectPro festoon lights

With scope for runs of up to 800m, our ConnectPro festoon lights are perfect for dressing large trees, being draped between posts or outlining buildings – to name a few.

These super bright polycarbonate covered bulbs, with handy hanging hooks, are pre-assembled for hassle-free event lighting. Connected with the ConnectPro ring and curtain accessories, you can use them to create stunning ceiling canopies.

CONNECTING: Male and female connectors slot together until the rubber seal is reached. Tighten the exterior cap using the wings, ensuring the connection is weatherproof. Our 4A rectified 240V power cable can support up to 720 Watts (e.g. 1,500m of linear string lighting).

ConnectPro icicle lights

ConnectPro LED icicle lights are extremely robust and designed for commercial use. Typically used for following the contours of buildings and structures, but also for suspending above walkways.

Being able to connect up to 500m is particularly convenient in town centres, and our flash bulb models add an extra magical touch.

CONNECTING: Male and female connectors slot together until the rubber seal is reached. Tighten the exterior cap using the wings, ensuring the connection is weatherproof. Our 4A rectified 240V power cable can support up to 720 Watts (e.g. 1,500m of linear string lighting).

ConnectPro accessories

With 15 different accessories in the ConnectPro range, these are the lifeblood of the whole system. They allow the free flow of installations, meaning you've got the flexibility to create any type and size of display you want.

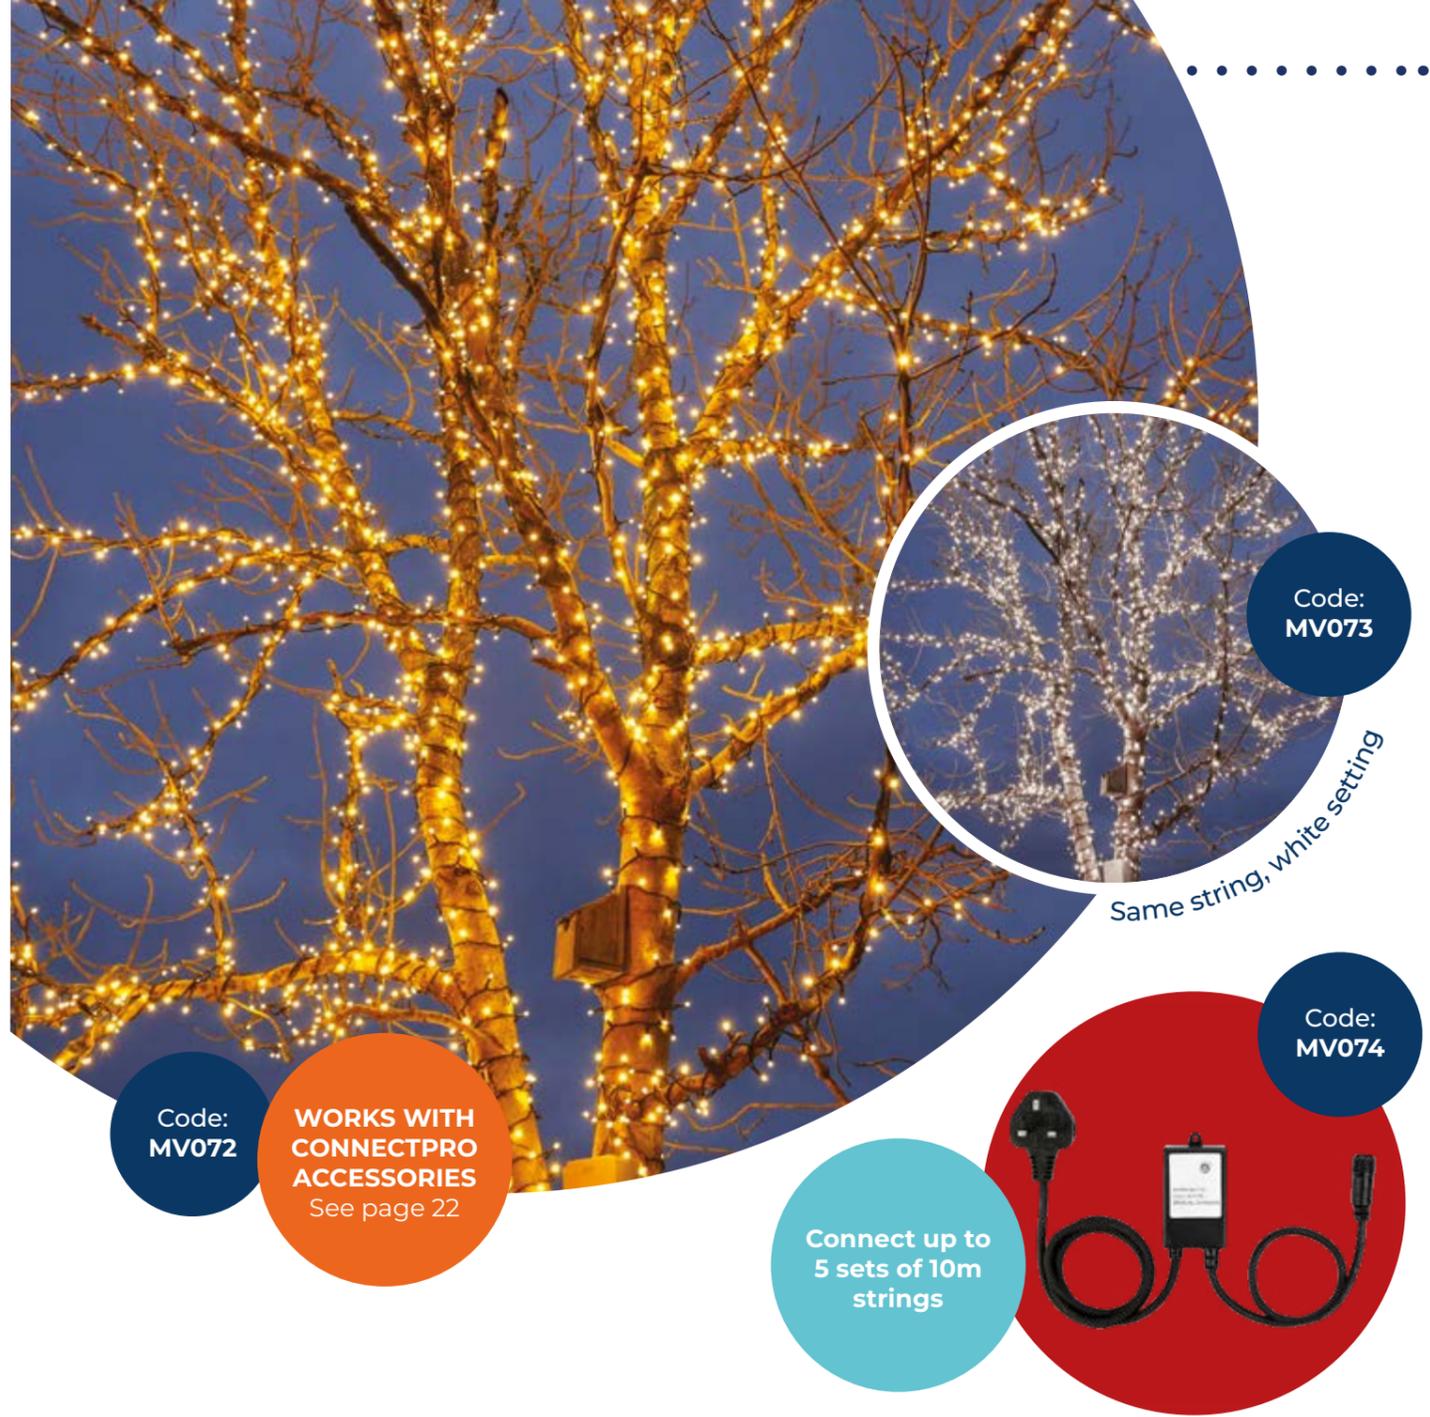

Including extension cables in 2m, 5m and 10m options, along with ring and curtain connectors, and 2 or 3 way connectors, the only limit to your display is your imagination!

CONNECTING: Male and female connectors slot together until the rubber seal is reached. Tighten the exterior cap using the wings, ensuring the connection is weatherproof. Our 4A rectified 240V power cable can support up to 720 Watts (e.g. 1,500m of linear string lighting).

Indoor & Outdoor Dual Colour String Lights

These dual colour string lights give your display even more flexibility than ever before. Using the dedicated power cord and controller, you can choose between static bright white, static warm white, or gradual changing – which softly changes between the two colours. Compatible with all ConnectPro accessories, and with all the same great benefits of this amazing range, the string and power cords are available in black or white rubber cabling.

Connectable lights with a difference – you pick the power!

The most versatile range of connectable lights we've ever stocked, the ConnectGo system gives you ultimate flexibility for your lighting display.

At the cutting edge of low voltage, multi-power-source lighting, this system offers you excellent performance, safety and versatility. Including all of our bestselling lighting products, like string lights, festoons

and curtain lights, everything in this range can be powered by either solar, battery, or 31V mains power.

The high quality PVC cable ensures durability in all weather and is backed by our market leading, 2 year anti-rust guarantee. All the products in this revolutionary range feature our professionally moulded connections, which are designed with shaped wings for a

reassuringly strong connection. There are six power supplies to choose from, for whatever your display needs, so you can power from 50 to 4,000 LEDs (400 metres), all with multifunction capability.

ConnectGo motifs

Rope light motifs are very versatile and can integrate into the ConnectGo system at any point. Stars or snowflakes can mix together with strings, icicles and garlands to create a medium scale Christmas project, such as a grotto or Christmas market.

With their white metal framework, they are easily attached to structures, branches, catenary wires and commercial Christmas trees, and are powered by mains (240V > 31V), or battery for remote installations.

CONNECTING: Male and female connectors slot together until the rubber seal is reached. **Max Load:** Small battery pack 200 LEDs (2 sets) / Medium battery pack 400 LEDs (3 sets) / Small transformer 600 LEDs (7 sets) / Medium transformer 1,600 LEDs (30 sets) / Large transformer 4,000 LEDs (50 sets) / Solar panel 300 LEDs (4 sets).

ConnectGo accessories

Adding even more flexibility to the ConnectGo range, the six different power options mean your lights can be installed virtually anywhere. Using mains power, you can run up to 600 LEDs (Small), 1,600 LEDs (Medium), or 4,000 LEDs (Large), all boasting 8 function controllers and an in-built memory chip. If access to mains power is a problem, our battery power pack options are here to save the day; power up to 200 LEDs from the Small or up to 400 LEDs from the Large. Offering the same brightness as mains power, you still get the multifunction and memory capabilities. We've also got the option of a solar panel, powering a maximum of 200 LEDs and featuring both static and twinkle functions, and our extensive accessory range.

CONNECTING: Male and female connectors slot together until the rubber seal is reached. **Max Load:** Small battery pack 200 LEDs / Medium battery pack 400 LEDs / Small transformer 600 LEDs / Medium transformer 1,600 LEDs / Large transformer 4,000 LEDs / Solar panel 200 LEDs.

Flexible, professional, commercial quality festoon lighting.

NOW IP55

The most popular choice for year round event lighting, festoons create show-stopping statement displays in every venue. We designed this universal system to extend up to an impressive 1,500 metres, making sure it adapts to any occasion.

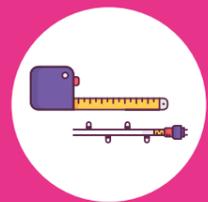

With 100% rubber cable and a robust socket design, the harness is suitable for both temporary and permanent displays. The unique winged connections mean that extending the system is effortless but, more

importantly, make a weathertight seal you can rely on. The harness also features 30cm, 50cm or 100cm socket spacing, and a rounded cable to be more aesthetically pleasing!

We offer a comprehensive range of outdoor bulbs too, with either B22 or E27 fittings. Our range has everything from modern LED G45s with opaque (0.5W) or transparent (1.2W) casings, to the latest vintage LED 'filaments' (4W) with dimmable capability. We've also added our brand new collection of traditional

shape A60 bulbs, which are available in white, warm white, yellow, blue, red and green, perfect for adding a splash of colour to any event.

A full range of accessories integrates seamlessly to make installations more dynamic and to make your life so much easier. The ring connector is definitely the most popular for creating centrepieces and suspended canopies.

Connecting
Male and female connectors slot together until the rubber seal is reached. Tighten the exterior cap using the wings, ensuring the connection is weatherproof. Our 7A 240V power cable can support up to 1,500 Watts (e.g. 3,000m of linear festoon lighting). The system meets all EU safety standards and RoHS requirements.

Lamp holder
Our lamp holders have been specifically designed to meet IP55 weatherproof standard and feature a durable bulb seal for performance year around. We have incorporated a pair of convenient fixing holes into the lamp which allow permanent or temporary fixing, either onto the side of a soffit or attached to a suspended cable.

Installation guidance:
If suspending without support cable:
Max 20m
If suspending with support cable (every 1m):
Max. 150 sets (3,000m)

FestoonPro belts / harnesses

With near unlimited uses, our professional festoon harness is most often displayed suspended, such as between lamp posts or fixed directly to buildings - typically to soffits or fascias. Festoons are really popular for dressing town centres, public spaces and large commercial trees, but they're also the go-to event lighting for weddings, festivals and theme parks.

If you already have the harness, our range of LED bulbs can be used to quickly personalise and update your display.

CONNECTING: Male and female connectors slot together until the rubber seal is reached. Tighten the exterior cap using the wings, ensuring the connection is weatherproof. Our 4A rectified 240V power cable can support up to 720 Watts (e.g. 1,500m of linear string lighting).

FestoonPro dimmable bulbs

Each one of our modern, low energy LED bulbs is suited to every harness in the FestoonPro system. Possibly our most popular bulb for long-term outdoor displays, our vintage glass designs feature dimmable 'filaments' and boast low power consumption too. They also look fantastic in bars, restaurants and events.

CONNECTING: Male and female connectors slot together until the rubber seal is reached. Tighten the exterior cap using the wings, ensuring the connection is weatherproof. Our 4A rectified 240V power cable can support up to 720 Watts (e.g. 1,500m of linear string lighting).

FestoonPro accessories

With 15 types of accessories available in this range, we've made sure you can create the most dynamic festoon displays possible, whilst saving you time and money on each installation.

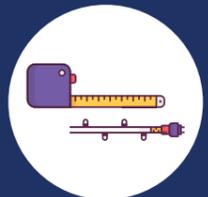

Extensions are definitely the most popular accessory, allowing lead cables to meet exactly the length you need, or for adding unlit sections in the display. The specially designed 10-way ring connector is superb for creating striking canopies, and our exclusive E27 pendant range also gives you scope to revamp indoor light fittings, or existing festoon displays; making sure your display is always on trend.

CONNECTING: Male and female connectors slot together until the rubber seal is reached. Tighten the exterior cap using the wings, ensuring the connection is weatherproof. Our 4A rectified 240V power cable can support up to 720 Watts (e.g. 1,500m of linear string lighting).

LED customisable linear lighting, 240V

Our market leading cut-to-length lights allow you to create a display that's entirely tailored to your individual needs. You can have rope light cut from 1m to 100m, our brand new ultra-bright strip light cut from 1m to 100m, and our on trend neon flex cut from 1m to 50m.

Cut-to-length neon flex, 240V

The biggest and most exciting trend to hit the lighting world, every commercial display needs neon! In warm white, white, blue, green, red or pink, there are 120 LEDs per metre, meaning your display will definitely stand out from the crowd. Cut from 1 metre to 50 metres, choose whatever length you need to create a bright and vibrant installation. Super flexible, this neon flex light can be bent into any shape and, since it's IP65 rated, you can create any display anywhere!

Our market leading cut-to-length lights allow you to create a display that's entirely tailored to your individual needs. You can have rope light cut from 1m to 100m, our brand new ultra-bright strip light cut from 1m to 100m, and our on trend neon flex cut from 1m to 50m. With a great range of connectable accessories, this is a simple indoor and outdoor plug and play solution for many applications.

Featuring 60 SMD LEDs per metre, in a variety of colours including red, green, blue, white, warm white and pink, this cut to length strip light boasts a super bright 350 lumen output per metre. The flexible yet sturdy construction allows you to sculpt it around corners for a perfect fit! Popular for adding a splash of vibrant colour to parties, weddings, and Christmas displays, this strip light is perfect for permanent displays in bars and restaurants too. The IP65 rating also means it provides its year-round brightness either indoors or outdoors.

Next generation smart lighting for professionals!

Twinkly Pro is comprised of smart addressable LEDs, and a connected mobile app, to create professional lighting displays; saving cost and time.

The capability to remotely change lighting effects for events, festivals, and celebrations year round gives towns, cities and shopping centres ultimate flexibility, whilst saving resources and time. The online cloud portal provides a virtual space to manage an entire project remotely, under an assigned login.

The Project Manager can control single or multiple elements, sync groups of elements, or manage the full installation; whether it's two wrapped trees in a park, or a combination of curtains, canopies, column displays and 3D features citywide.

KEY FEATURES

- WiFi / Bluetooth / Ethernet
- Combine
- Cloud Management
- Upload Effects
- Addressable LEDs
- Automated Light Mapping

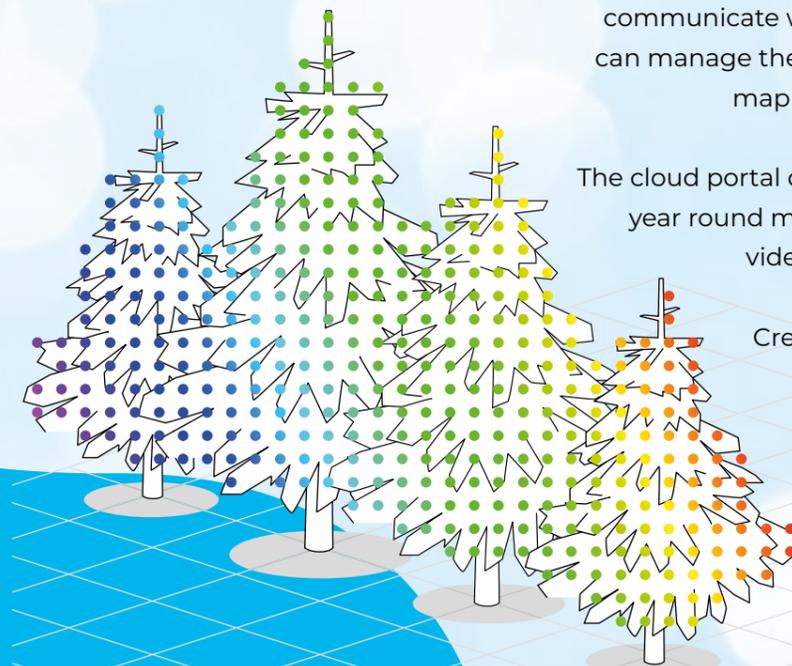

Map and manage lights from your palm!

Thanks to the ethernet and wi-fi connectivity, all of our controllers communicate with each other and with the Twinkly app. So you can manage them one by one or as a group. This means you can map and manage up to 10,000 lights from your palm.

The cloud portal can also give a council added dynamism for their year round marketing by including colours, patterns and even video to promote key events or cultural celebrations.

Create your own scenarios, wherever your lights are, however you set them up.

[VIEW TWINKLY PRO](#)

business.festive-lights.com/twinkly-pro

We've got our bulbs screwed in and our lights switched on when it comes to Twinkly - the revolutionary, app-controlled Christmas lights.

Epitomising the future of lighting décor, this impressive and unique range of lights allows you to customise your lighting display, including both the colour and pattern sequence of the lights, with full control of each individual LED.

Simple to use, the lights are controlled using an iOS or android compatible app from your smartphone. The impressive spec list also includes a light and music sensor, compatibility with Google Home and Amazon Alexa, plus much more.

Swipe to find your perfect display match!
